

Ballast Small/Mid Cap ETF

Summary Prospectus November 24, 2020

Before You Invest

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund, including its statement of additional information (SAI) and most recent reports to shareholders, online at www.mgmtetf.com. You can also get this information at no cost by calling 1-866-383-6468 or by sending an e-mail request to Fulfillment@ultimusfundsolutions.com. This Summary Prospectus incorporates by reference the Fund's entire prospectus and SAI, each dated November 24, 2020. Shares of the Fund are listed and traded on NYSE Arca, Inc.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports may no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from the financial intermediary that services your shareholder account. Instead, the reports may be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may be eligible to elect to receive shareholder reports and other communications from the financial intermediary that services your shareholder account electronically. If you would like to sign up for electronic delivery of shareholder communications, please contact your financial intermediary for instructions.

You may elect to receive all future reports in paper free of charge. You will need to contact your financial intermediary to continue receiving paper copies of shareholder reports. Your election to receive reports in paper will apply to all funds held with your financial intermediary.

Investment Objective

The Ballast Small/Mid Cap ETF (the "Fund") seeks to generate positive risk adjusted returns.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and examples below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.95%
Other Expenses ¹	0.42%
Total Annual Fund Operating Expenses	1.37%
Fee Waiver and/or Expense Reimbursement ²	(0.27)%
Total Annual Fund Operating Expenses (After Fee Waiver and/or Expense Reimbursement)	1.10%

¹ Other Expenses are based on estimated amounts for the current fiscal year.

² The Fund's adviser contractually has agreed to waive its management fee and/or reimburse expenses so that total annual Fund operating expenses, excluding portfolio transaction and other investment-related costs (including brokerage fees and commissions); taxes; borrowing costs (such as interest and dividend expenses on securities sold short); acquired fund fees and expenses; fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); any administrative and/or shareholder servicing fees payable pursuant to a plan adopted by the Board of Trustees; expenses incurred in connection with any merger or reorganization; extraordinary expenses (such as litigation expenses, indemnification of Trust officers and Trustees and contractual indemnification of Fund service providers); and other expenses that the Trustees agree have not been incurred in the ordinary course of the Fund's business, do not exceed 1.10% through January 31, 2022. This expense cap may not be terminated prior to this date except by the Board of Trustees. Each waiver/expense payment by the adviser is subject to recoupment by the adviser from the Fund in the three years following the date the particular waiver/expense payment occurred, but only if such recoupment can be achieved without exceeding the annual expense limitation in effect at the time of the waiver/expense payment and any expense limitation in effect at the time of the recoupment.

Expense Example:

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year, the Fund's operating expenses remain the same, and the expense reduction/reimbursement described above remains in place for the contractual period only. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 year	3 years
\$112	\$407

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the Example above, affect the Fund’s performance. The Fund’s portfolio turnover rate will be available after the Fund completes its first fiscal year.

Principal Investment Strategies

Ballast Asset Management, LP, the Fund’s investment adviser (the “Adviser”), seeks to achieve positive risk adjusted returns, meaning positive rates of return after adjustment for the amount of risk taken, by investing primarily in equity securities of small and midsize U.S. companies that the Adviser believes are underpriced due to misperception of future earnings growth relative to the Adviser’s expectations for growth over the long-term. The Adviser considers small capitalization and mid capitalization companies to be those with market capitalizations between \$100 million and \$15 billion at the time of the initial purchase. The Fund may invest in companies in any economic sector.

The Adviser, which actively manages the Fund, emphasizes investments in high quality, financially sound companies that have the ability to execute their business plans in both favorable and unfavorable environments leading to outperformance over the long term. In identifying investments, the Adviser evaluates the company as a whole, including (1) whether management teams have demonstrated successful operation of their businesses in unfavorable and favorable market environments; (2) balance sheets; (3) cash flow; and (4) return on capital.

Under normal circumstances, the Fund invests at least 80% of the value of its net assets (plus borrowings for investment purposes) in equity securities (principally common stocks) of domestic companies with small to medium market capitalizations (the “80% Policy”). The 80% Policy is a non-fundamental investment policy and therefore may be changed by the Board of Trustees upon at least 60 days’ notice to shareholders.

The Fund may also invest all or substantially all of its assets in cash and cash equivalents, including money market funds and other short-term fixed income investments, in seeking to protect principal, or when, in the Adviser’s opinion, there are not sufficient companies appropriate for investment. As an alternative to holding cash or cash equivalents, the Adviser may invest the Fund’s assets in shares of other investment companies, including open-end and closed-end funds and exchange traded funds (“ETFs”) (collectively, “Underlying Funds”) in order for the Fund to be more fully invested.

Principal Risks

All investments involve risks, and the Fund cannot guarantee that it will achieve its investment objective. An investment in the Fund is not insured or guaranteed by any government agency. The Fund’s returns and share price will fluctuate, and you may lose money by investing in the Fund. Therefore, you should consider carefully the following risks before investing in the Fund.

- **Market and Geopolitical Risk.** Market risk includes the possibility that the Fund’s investments will decline in value because of a downturn in the stock market, reducing the value of individual companies’ stocks regardless of the success or failure of an individual company’s operations. The value of your investment in the Fund is based on the market prices of the securities the Fund holds. These prices change daily due to economic and other events that affect markets generally, as well as those that affect particular regions, countries, industries, companies or governments. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund’s portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. There is a risk that you may lose money by investing in the Fund.
- **COVID-19 Risk.** An outbreak of infectious respiratory illness caused by the novel coronavirus known as COVID-19 was first detected in China in December 2019 before spreading worldwide and being declared a global pandemic by the World Health Organization in March 2020. COVID-19 has resulted in travel restrictions, closed international borders, enhanced health screenings, disruption and delays in healthcare services, prolonged quarantines, cancellations, temporary store closures, social distancing, government ordered curfews and business closures, disruptions to supply chains and consumer activity, shortages, highly volatile financial markets, and general concern and uncertainty.
- **Small and Mid-Cap Company Risk.** Securities of companies with small and medium market capitalizations are often more volatile and less liquid than investments in larger companies. Small and mid-cap companies may face a greater risk of business failure, which could increase the volatility of the Fund’s portfolio.
- **Active Management Risk.** The Fund is actively-managed and is thus subject to management risk. The Adviser will apply its investment techniques and strategies in making investment decisions for the Fund, but there is no guarantee that its techniques will produce the intended results.

Summary Prospectus November 24, 2020

- **Fluctuation of Net Asset Value Risk.** The net asset value (“NAV”) of the Fund’s shares will generally fluctuate with changes in the market value of the Fund’s holdings. The market prices of the shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the shares on the Exchange (as defined in the “Purchase and Sale of Fund Shares” section of this prospectus).
- **Market Trading Risk.** The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, and periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors, among others, may lead to the Fund’s shares trading at a premium or discount to NAV.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant (as defined in the “How to Buy and Sell Shares” section of this prospectus) may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as Authorized Participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units (as defined in the “Purchase and Sale of Fund Shares” section of this prospectus), Fund shares may trade at a discount to NAV and possibly face trading halts and/or delisting.
- **Company Risk.** The value of the Fund may decrease in response to the activities and financial prospects of an individual company in the Fund’s portfolio. The value of an individual company can be more volatile than the market as a whole.
- **Underlying Funds Risk.** When the Fund invests in an Underlying Fund, the Fund indirectly will bear its proportionate share of any fees and expenses payable directly by the Underlying Fund. Therefore, the Fund will incur higher expenses, many of which may be duplicative. In addition, the Fund may be affected by losses of the Underlying Funds and the level of risk arising from the investment practices of the Underlying Funds (such as the use of leverage). ETFs and closed-end funds are subject to additional risks, such as the fact that their shares may trade at a market price above or below their net asset value or that an active market may not develop.
- **Money Market Fund Risks.** When the Fund invests in an underlying fund, including a money market fund, the Fund indirectly will bear its proportionate share of any fees and expenses payable directly by the underlying fund. Therefore, the Fund will incur higher expenses, many of which may be duplicative. Although each underlying money market fund in which the Fund may invest seeks to maintain the value of the investments at \$1.00 per share, there is no assurance that the underlying fund will be able to do so.
- **Equity Securities Risk.** The net asset value of the Fund will fluctuate based on changes in the value of the U.S. equity securities held by the Fund. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions.
- **Inflation Risk.** At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.
- **Limited History of Operations Risk.** The Fund is a new ETF and has a limited history of operations for investors to evaluate.
- **New Adviser Risk.** The Portfolio Manager has prior experience managing a mutual fund. However, the Adviser has not previously managed a mutual fund or an ETF. As a result, investors do not have a long-term track record of managing an ETF from which to judge the Adviser and the Adviser may not achieve the intended result in managing the Fund. ETFs and their advisors are subject to restrictions and limitations imposed by the Investment Company Act of 1940, as amended, and the Internal Revenue Code, that do not apply to the adviser’s management of other types of individual and institutional accounts.
- **Cybersecurity Risks.** Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices utilized by the Fund potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.
- **Operational Risk.** The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund’s service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund and its agents seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

Performance

Performance information will be available after the Fund completes a full calendar year of operations.

Portfolio Management

Investment Adviser

Ballast Asset Management, LP

Portfolio Manager

- Ragen Stienke, CFA, Portfolio Manager, Founder and CEO of the Adviser, has been the portfolio manager of the Fund since its inception in November 2020.

Purchase and Sale of Fund Shares

The Fund will issue and redeem shares at NAV only in large blocks of shares (each block of shares is called a “Creation Unit”) and only to Authorized Participants that have entered into agreements with the Fund’s distributor (the “Distributor”). Creation Units are issued and redeemed for cash and/or in-kind for securities. Except when aggregated in Creation Units, the shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”) and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV. Individual shares may only be purchased and sold in secondary market transactions through brokers.

Tax Information

The Fund’s distributions are taxable and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred account, such as a 401(k) plan, individual retirement account (IRA) or 529 college savings plan. Tax-deferred arrangements may be taxed later upon withdrawal of monies from those accounts.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank or trust company), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
